**BACKGROUND INFORMATION:** On February 9, 2000, eight bids were received and opened for this project. The bid results are shown below:

Bidder	Amount
<b>Golden State Utility, Sacramento CA</b>	<b>\$304,999.00</b>

Pacific Excavation, Elk Grove CA	337,145.00
QBC Inc., Dixon CA	381,775.00

Norwood Construction, Pleasanton CA	417,918.00
Warren E. Gomes, Rio Vista CA	543,698.00

This project will install substructures (electric conduits and vaults) in Turner Road from McLane Substation easterly past Mills Avenue and westerly to Lower Sacramento Road/Woodhaven Lane. The substructures will allow the Department to install new high voltage cable systems for replacement of existing cable and conduit systems originating at McLane Substation.

The existing facilities, installed in the late 1960's, are deteriorated and are no longer considered reliable components of the distribution system. The existing non-PVC plastic conduit system cannot accommodate today's cables in addition to having collapsed in several sections. This project will also provide necessary additional underground supply lines (feeders) from the substation to the existing and developing areas on the west side of the City.

Plans and Specifications for this project were approved by the City Council at the meeting of January 6, 2000.
